

Her AI Studio

A CREATIVE AI STUDIO FOR WOMEN

JUNE 2026

HERAISTUDIO.ORG

About the Studio

WHO ARE WE?

Founded by experienced community and technical professionals, Her AI Studio is a grass-roots program designed to provide free education and hardware kits to enable builders who identify as women to build

MISSION

AI needs to be informed by women builders; AI Studio is a space for girls and women to experiment with local AI models without vendor lock-in, building cyberdecks alongside an inclusive community.

ONE-OF-A-KIND

By educating women in a safe space using local building techniques across hardware and software, we will educate a new generation of women builders who will make AI better, and make better AI.

Our Curriculum

WEEK 1

Build a virtual cyberdeck using local models on the web. Learn core concepts on AI ethics, privacy, and security. Completing this module shows readiness to earn a Her AI Studio Grant.

WEEK 2

Connect your local web project to hardware and continue building your cyberdeck. Learn the basics of hardware hacking.

WEEK 3

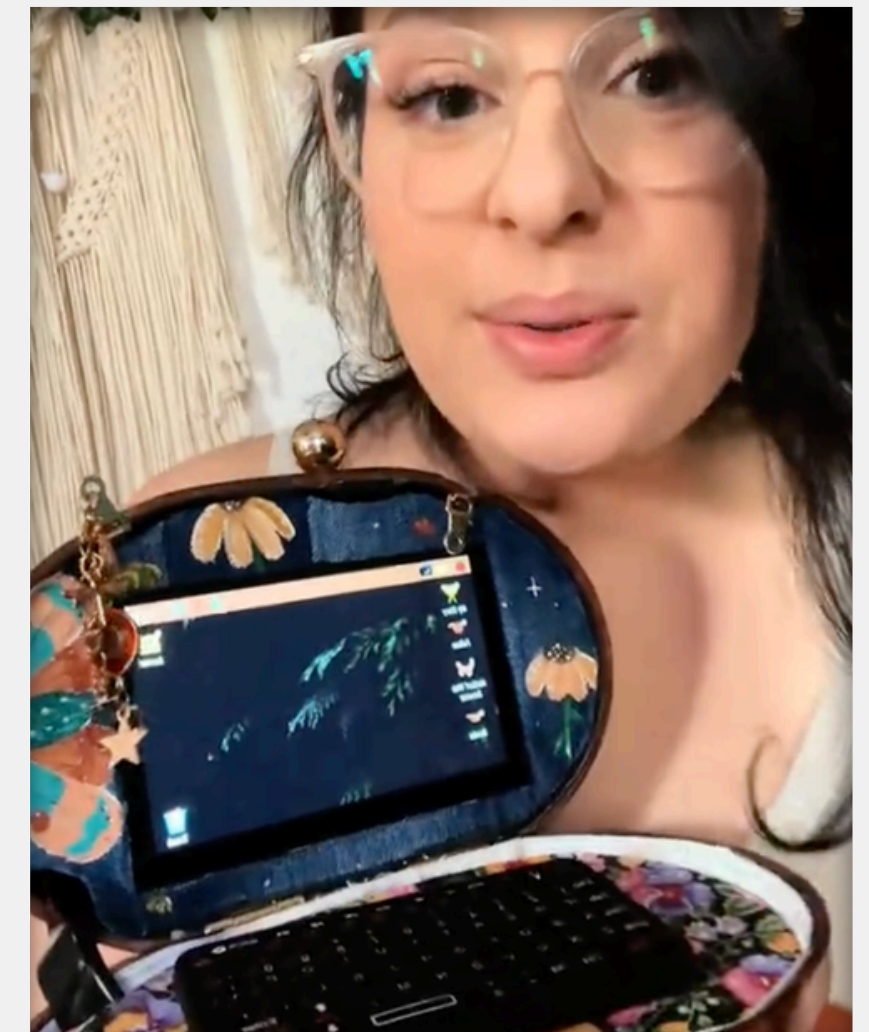

Using your Her AI Studio grant hardware kit, build your full cyberdeck. Customize it, then demo it in a global capstone showcase.

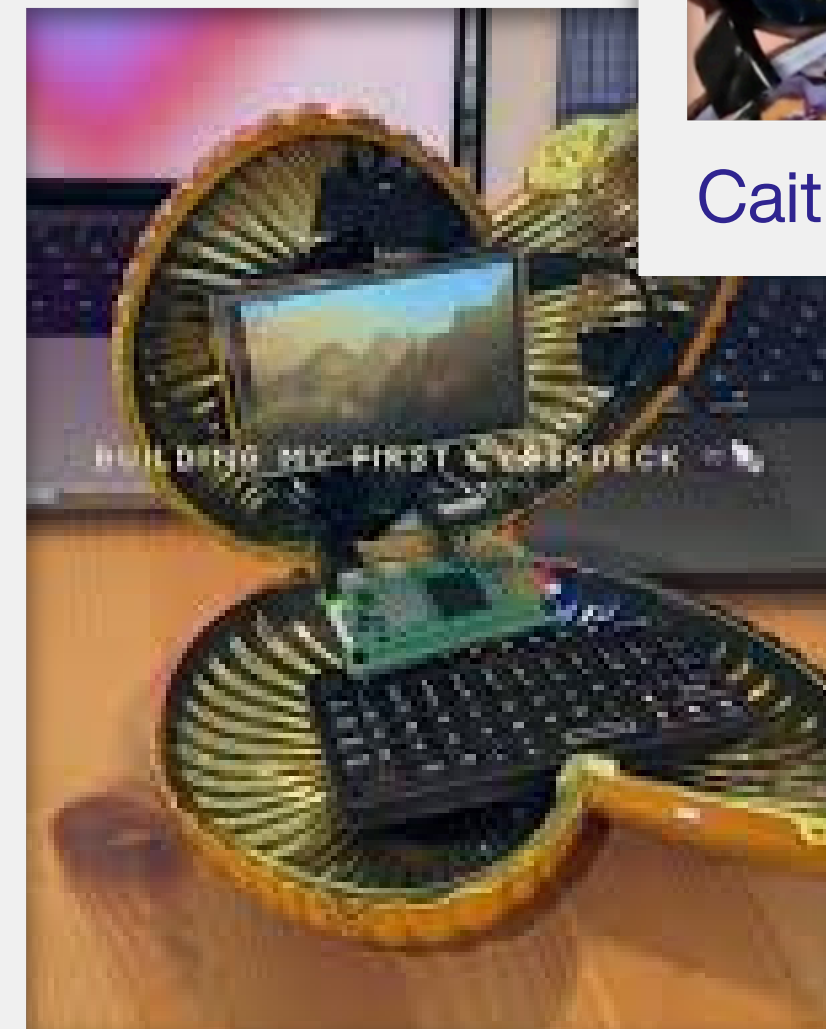

About Cyberdecks

A cyberdeck is a custom-built, often portable computer designed in the spirit of cyberpunk fiction. Think of it as a DIY computing workstation that emphasizes local, offline computing, the builder's personality, self-sufficiency, and specialized functionality over sleek commercial design.

Experiencing a renaissance on TikTok, especially via female engineers, cyberdecks are seen less as computers and more as a form of creative engineering—a combination of computing, industrial design, electronics, and storytelling. Each deck reflects its creator's vision of what a personal computing device should be.

Our KIT

While cyberdecks are ideally built using salvaged parts, we recognize the challenges inherent in this approach. At our AI Studio, onboarded students are granted the parts needed to build their cyberdeck. This includes:

- Arduino Uno Q 4G
- Mini Webcam
- LCD Display
- Mini Keyboard
- Audio Kit
- Cables

Student provides an enclosure or repurpose the kit's shipping box.

Our Supplier

We have direct connections to suppliers in Shenzhen who will help us acquire peripherals in bulk. We will purchase Arduinos directly from the Arduino store.

Kevin, our guy in Shenzhen

Sponsorship Opportunity

We are actively seeking sponsors whose mission is aligned to ours.

If you're in a company that is excited to help the next generation of women engineers build, please reach out.

Sponsorship money is used to acquire and ship our cyberdeck kits and for mentor onboarding.

REACH

Build the AI pipeline by enabling global builders to skill up in AI engineering.

BRANDING

Showcase the alignment between your brand and our mission.

ENGAGE

Help us build innovative education modules to bridge software and hardware while teaching about security, privacy, and self-hosted models.

Individual Sponsorship Levels

Contact us for corporate sponsorship opportunities

PLATINUM

\$5000. Your sponsorship covers costs* of 20 kits, enough to cover a local cohort's needs

GOLD

\$1000. Your sponsorship covers costs of 4 kits

SILVER

\$500. Your sponsorship covers costs of 2 kits

*Hardware kits cost approximately \$200; we include boxing and shipping as part of the cost. Kits will go to cohort leaders for redistribution

Sponsorship Packages*

BENEFIT	PLATINUM	GOLD	SILVER
Logo on all promotional materials	✓	✓	✓
Logo on web site	✓	✓	✓
Social Media Exposure	2 shout-outs	1 shout-out	Shared mention
Newsletter shout-out	2 shout-outs	1 shout-out	Shared mention

*** If these packages don't work for you, contact us at heraistudio.org to design a custom package!**

Join Us!

WWW.HERAISTUDIO.ORG

Help us build this brand new grass roots nonprofit initiative!

BECOME A SPONSOR

Funding will help us kickstart hardware acquisition and prepare our cohort instructors

HELP US BUILD

Actively seeing curriculum designers and testers for our virtual and real cyberdeck projects

VOLUNTEER TO TEACH

Volunteer to gather and teach a cohort of students interested in software and hardware hacking

JOIN THE TEAM

Advisory board and spots on our leadership team are open!
